

Prepositions PART ONE PART TWO PART THREE

INTRODUCTION

This program is a very easy, simple DOS grammar program for studying prepositions. It doesn't have many two-word (phrasal) verbs -- just regular prepositions. It's best for **Level 2 up**, not too good for Level 1 because it has past verbs and some difficult vocabulary.

First, look at the contents below for each "Part". Then, choose the part you want to study: they are actually three separate programs.

USING THE PROGRAM

The lessons are VERY easy to use. You get a list of five prepositions first, with an example sentence for each. Then, you get a fill-in sentence with three choices, and you type # 1, 2, or 3 for the correct answer. After one wrong answer, you are shown the correct answer.

To quit, type **S** (for stop). To jump to the next lesson, type **N** (for new).
